

Novartis in society US reports

Novartis is building a leading focused medicines company powered by advanced therapy platforms and data science. At the same time, we are pursuing innovative approaches to making pharmaceuticals more affordable and accessible and strengthening our communities and society. Since 2016, we have published an annual Novartis in Society US Report, which details our goals and activities in support of patients and their families, healthcare providers, the communities where we live and work, and our healthcare system. The report highlights some of the many ways we are contributing to a stronger and healthier society, working closely with partners in government, industry, patient groups, communities, philanthropy and other areas. Together, we are driving meaningful change to accelerate innovation, expand patient access to medicine and create a more inclusive and sustainable healthcare system benefitting all.
